BookMyFood Frontend Setup

BookMyFood — Frontend Setup (Angular)

Requirements:
- Node 20+, Angular CLI 17+

Steps:
1) cd ui-bookmyfood
2) npm install
3) ng serve -o

Environment:
- API base: http://localhost:8080
- Saves JWT to localStorage

Screens:
- Login/Register
- Food list (GET /food)
- Cart (client-side)
- Checkout (POST /order)
- My Orders (GET /order/my)

Auth:
- AuthInterceptor adds Authorization: Bearer <token> for secured routes
- Guard protects /cart and /orders
